WILD.IO ACADEMY

Poker hand rankings

All 10 hands from best to worst. The odds are for a five-card hand dealt from a 52-card deck (2,598,960 possible hands).

#	HAND	EXAMPLE	COMBINATIONS	ODDS
1	**Royal flush**		4	1 in 649,740
2	**Straight flush**		36	1 in 72,193
3	**Four of a kind**		624	1 in 4,165
4	**Full house**		3,744	1 in 694
5	**Flush**		5,108	1 in 509
6	**Straight**		10,200	1 in 255
7	**Three of a kind**		54,912	1 in 47.3
8	**Two pair**		123,552	1 in 21.0
9	**One pair**		1,098,240	1 in 2.37
10	**High card**		1,302,540	1 in 2.00

Suits don't rank. Hands that differ only by suit are equal and split the pot.

The wheel: A-2-3-4-5 is a straight (the lowest). Q-K-A-2-3 is not.

Ties: compare the cards inside the hand first, then the kickers, highest first. Faded cards above are kickers.

Your best five cards play. In Hold'em, choose any five of your seven cards.
